

Call for applications for PhD students for the blended mobility run

MILETUS project addresses capacity building in the field of mobility for students and PhD students from Serbia and Ukraine. This is the third Call for applications within the MILETUS project which is aimed at the mobility of PhD students. The proposed mobility program for PhD students combines both real and virtual mobility runs. The main objectives of the mobility program for PhD students are enhancing of research quality and development of transferable skills through interdisciplinary project based research topics. Blended mobility provides PhD students an opportunity for joint work with access to research materials and resources of host university in close collaboration with research fellows and professors of host universities.

About MILETUS blended mobility program for PhD students

- Blended mobility run for PhD students from Ukraine and Serbia is a combination of virtual and real mobility run.
- A total of 37 students from Partner Universities in Ukraine and Serbia will be selected for the blended mobility run.
- The blended mobility run is divided into 3 phases:

Phase I (virtual): During the first preliminary phase students under the supervision of professors of host university should define the joint research topic, research methodology and expected results of the research (e.g. scientific papers, conference material etc.). PhD students will work in international and interdisciplinary groups of 2 -3 persons.

Phase II (real): During the second phase PhD students will travel to the host universities for 2 months for active cooperation with research fellows and professors of host universities. This allows the PhD students to experience exchange, to access research materials and resources and to conduct research activity at the host institution.

Phase III (virtual): The third and final phase involves evaluation of the results and finalization of the joint paper.

Timescale of the blended mobility run for PhD students

- The duration of the blended mobility run is **5,5 months**.
- Planned period of the blended mobility is from **January 2019 until June 2019** with real phase from **March 2019 until April 2019**.
