September 16-18, 2019, Belgrade, Serbia

ERASMUS+ MILETUS - Event report

Date: 10-Oct-19

Event description

- DEV 7.5.4 Final Project meeting; DEV 7.6 Final Steering Committee meeting; DEV 5.10 External quality control; WP6 Dissemination of the project results.
- Place: Belgrade, Serbia
- Date: September 16-18, 2019
- Number of participants: 26 (19 females and 7 males).

The final project meeting, which aimed to summarize all project activities and evaluate project performance, took place on 16-18 September 2019 in Belgrade, Serbia. The Singidunum University warmly welcomed the participants and took care of the organisational issues of the project meeting.

The project meeting (**Day 1, September 16, 2019**) started with the introductory presentation of the project coordinator on the implementation of the MILETUS project, continued with the round of presentations of the partner country universities focusing on the relevance of the project results at institutional, individual, national and regional level. The main project achievements, strengths and challenges were presented and discussed among the participants. The subsequent presentations of WP-leaders, responsible for the realization of the project work packages, summarized the project activities carried out and described the difficulties, deviations and challenges in WP implementation as well as the approaches to solving problems in the project implementation. The presentations of the Ministries (MESU and MEST) concluded the discussion on the relevance of the project results at national level and their impact on the realization of mobility programs in Ukraine and Serbia.

The second day of the project meeting (**Day 2, September 17, 2019**) began with an online (Skype) session on the dissemination of the project results, held by the project coordinator, and a subsequent online presentation on the quality of dissemination activities held by POLIMI, responsible for the quality of project implementation. The following presentations by POLIMI on the quality of project implementation (WP5) and the final discussion with the external evaluator of the project concluded the online session.

The workshop to develop an action plan for the dissemination of the final project-related materials and final publications to other Ukrainian and Serbian HEIs began with the presentation of the latest version of the final project publication (Methodological framework for the virtual/blended mobility programs).

Subsequently, the Ukrainian and Serbian parts of the consortium, with ministerial support, developed the action plan for the dissemination of the project results to other HEIs. As the dissemination events at ministerial level are envisaged after the end of the project lifetime, all organisation issues, such as premises, resources, participants, and technical opportunities e.g. for the online session, should be carefully planned. All key aspects of the organisation of the dissemination event at ministerial level as well as the possibilities of combining the MILETUS dissemination event with other thematic ministerial events in order to minimize the costs of participation were discussed and as a result, the to-do plans for the realization of the dissemination events in Ukraine and Serbia were elaborated.

The concluding financial consulting given by the project coordinator summarized the status quo in the preparation of the financial reports and set the deadlines for the completion of the reporting and submission to the project coordinator.

The third day of the project meeting (**Day 3, September 18, 2019**) began with the summary of the project cooperation followed by a first brainstorming on the sustainability of the project results and the partnership. The final Steering Committee meeting summarized the experiences of the project and became the last milestone of the MILETUS project implementation.

We would like to thank all consortium partners and all participants involved in the project realization for your cooperation and your contribution to the project implementation and improvement of the mobility programs in general.
